

INTEGRATION TO 3RD PARTY PAYROLL SYSTEMS

BACKGROUND AND THE PLACEMENT

HUMAN CAPITAL MANAGEMENT

IFS CLOUD – 21R1

INTEGRATION TO 3RD PARTY PAYROLL SYSTEMS

BACKGROUND

- An increasing number of IFS customers operate globally and need easy to manage multi-national payrolls.
- To provide our customers with the simplest, best solutions and experience in the future, we have modernized our integration approach with a new set of standard interfaces and APIs that will make it simpler to integrate with third party payroll providers around the world.
- Also, we have established partnerships with selected payroll software/services vendors to enable us to offer certified integrations globally.
- We know that customers apply different strategies to operating payroll, whether via a service provider, in-house operations or a combination of both, and we plan to support these different payroll operational models.

INTEGRATION TO 3RD PARTY PAYROLL SYSTEMS

OFFERING **CHOICE** FOR OUR **CUSTOMERS**

IFS Cloud: the global Payroll integration offering, replaces the previous IFS Payroll extension for local markets

- For customers who want all in one outsourced payroll
- Global provider
- XML interface to IFS
- Does not require major tool configurations
- Referral Partnership

- For customers who want to keep payroll inhouse (Need only the tool) and want customization
- Modern global Cloud architecture
- Integration with IFS through APIs
- Requires localization for the customer
- Referral/Co-sell Partnership

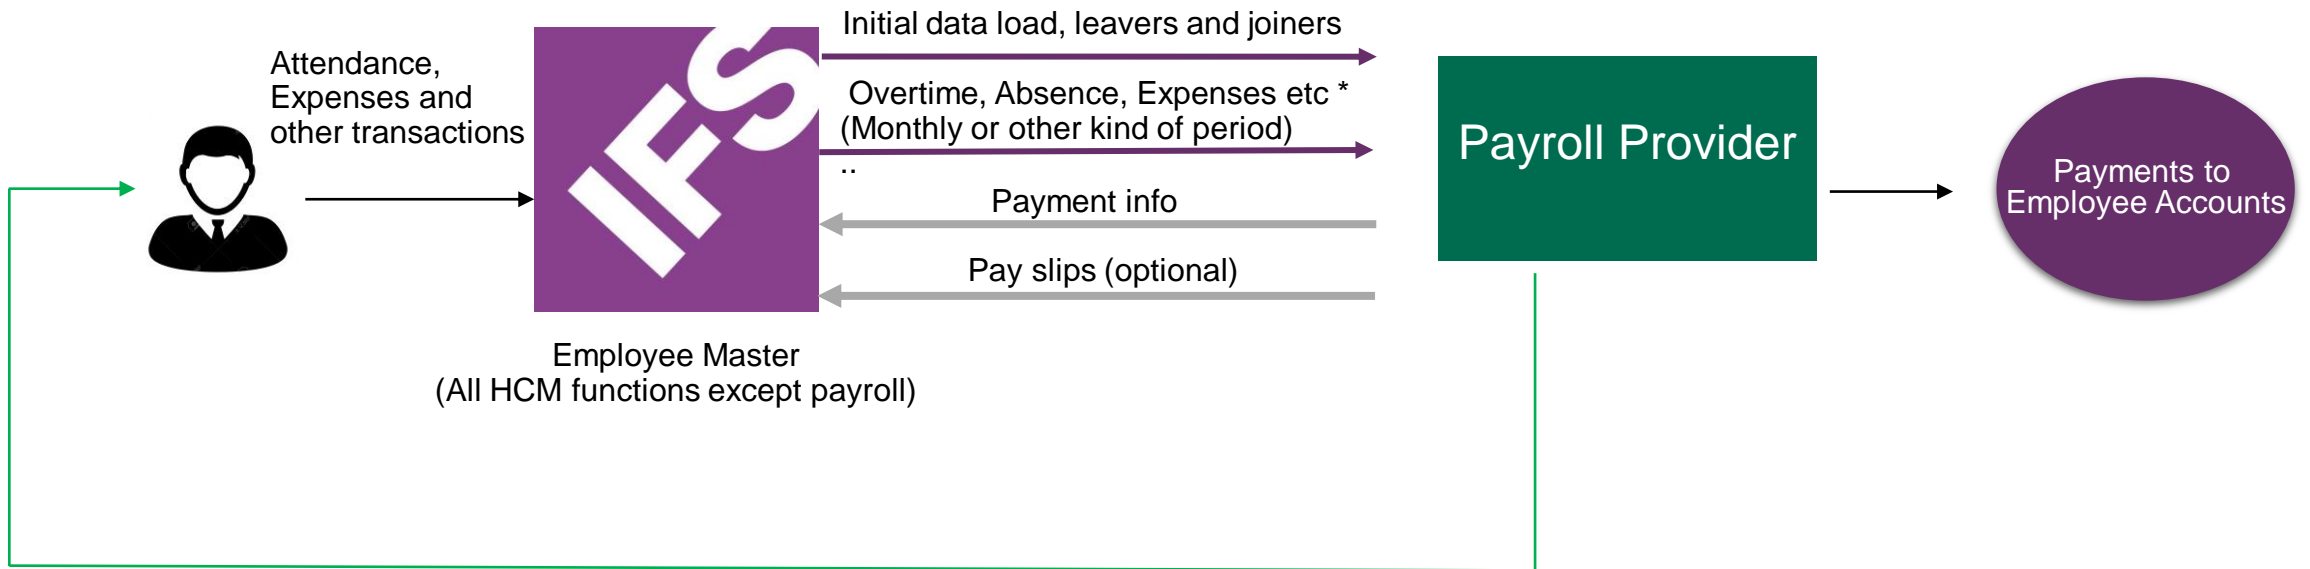

APIs FOR LOCAL PAYROLL PROVIDERS OF CUSTOMER'S CHOICE

- For customers who want to use any other Payroll solution
