SUMMARY

SUMMARY

CUSTOMER EXPERIENCE

VALUE

CUSTOMER EXPERIENCE

OVERVIEW

USER EXPERIENCE

User flows, processes, screen designs

INTELLIGENT & AUTONOMOUS

Practical and affordable applications of technology that add business value

TECHNOLOGY

Underpinning the application to enable choice and innovation

FUNCTIONALITY

Feature and functions within the application that create experiences

SERVICES

Value is only delivered when it's enabled

BUSINESS VALUE ENGINEERING

Articulating how customers create value and measuring return on investment

USER

EXPERIENCE

AURENA

Fast to adopt, easy to use, browser based responsive technology

LOBBIES

Bring together analysis, information, activities for efficient ways of working

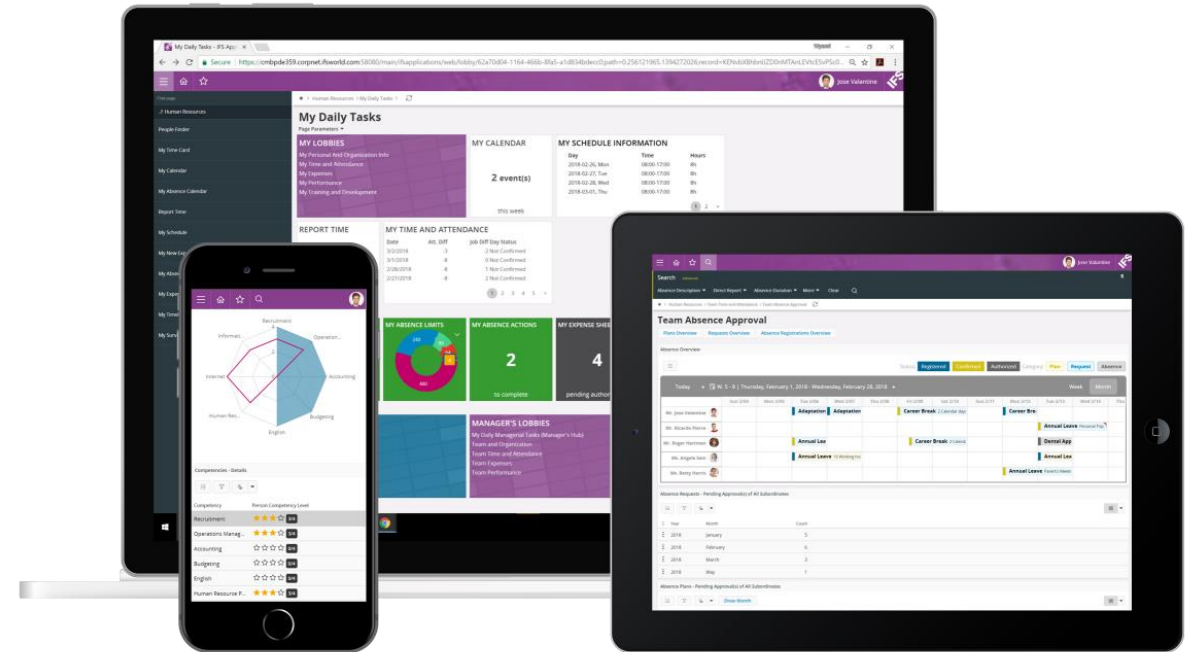

CONSUMER FIRST

Adapted for the complex business scenario's and environments of our customers

PERSONALIZATION

Control over the information that matters most

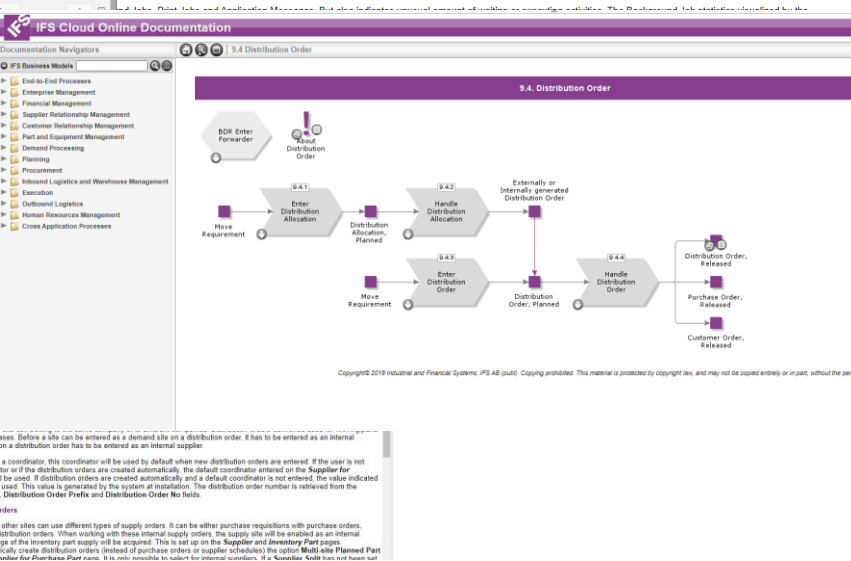

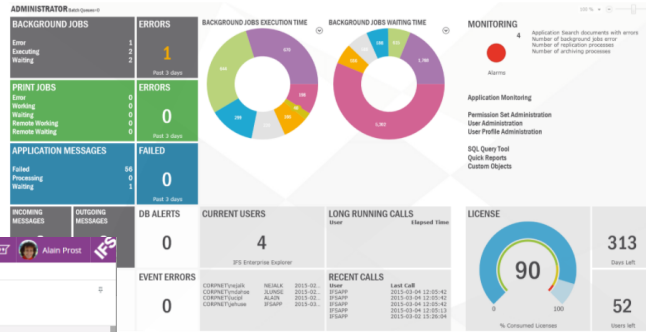

DOCUMENTATION AND ONLINE HELP

Administrator Lobby

The Administrator Lobby is a page highlighting and visualizing important information for Application Administrators. The page is a start point to find any issues that need further attention. Most of the page elements links to a window for handling / viewing the data. The page can be personalized and customized. Read more about the [IFS Lobby](#) concept.

The tool is complemented by the [IFS System Monitoring Console](#) that monitors the infrastructure.

ONLINE HELP

12,000 documents to support application implementation and faster adoption of innovation

TECHNICAL

Technical documentation, open without barriers and Lobbies for fast access to system information

DEVELOPER

Faster to innovate and keep pace with changing markets

MOBILE

EXPERIENCE

BRANDING

Enabling customers mobile apps to present in their branding

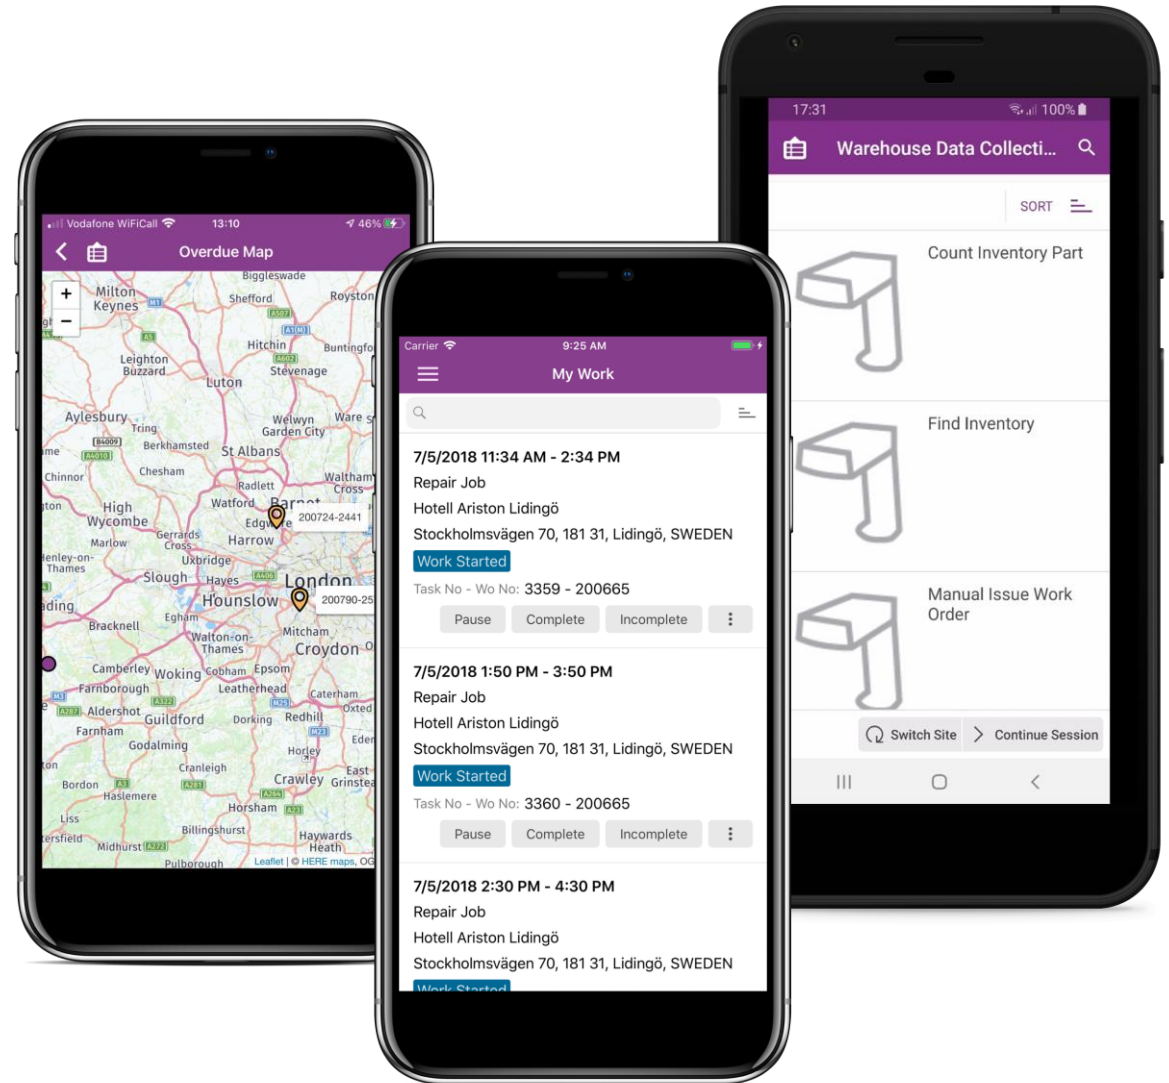

MAPS

Embedded map capability within the mobile framework
